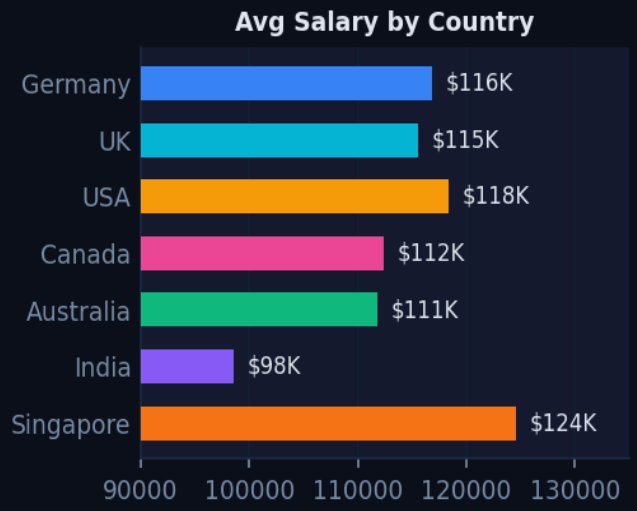
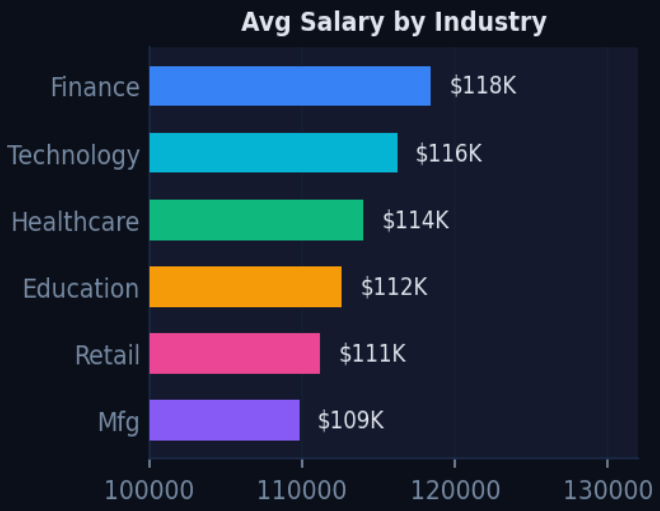
Salary Intelligence

How compensation varies by role, country, and industry — and what drives the biggest pay differences.





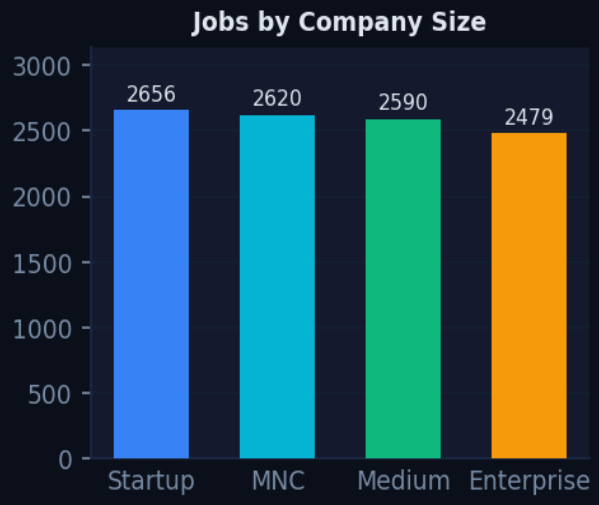
SALARY STATISTICS

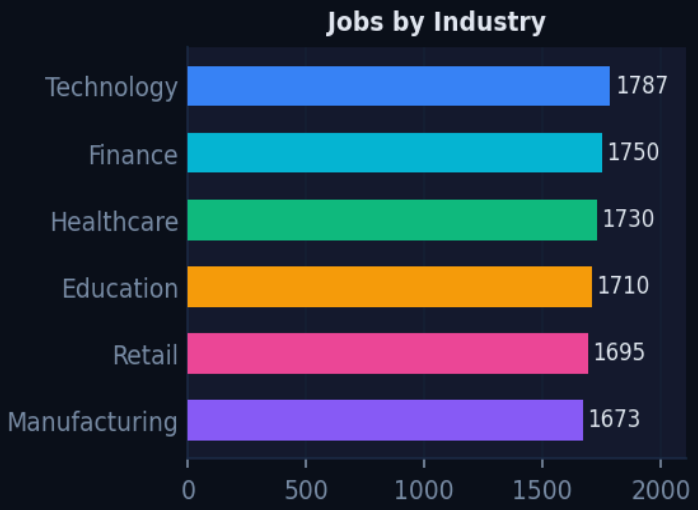
Mean: $113,438 | Median: $113,082 | Std Dev: $31,389 | Range: $45,083 – $204,143 The near-identical mean and median confirm a symmetric bell-shaped distribution. Singapore leads all countries with a $124,600 average — $26K above India's $98,600. AI Engineers command the highest role-based salary across every country.

— 03

Roles, Companies & Industries

Which companies, sectors, and job titles are driving AI talent demand globally.





Job Title Distribution Detail

Job Title	Count	Share	Note
Business Analyst	1,773	17.1%	Most postings — demand for data interpretation
AI Engineer	1,742	16.8%	Core AI development role
ML Engineer	1,740	16.8%	Model building & deployment
Data Analyst	1,711	16.5%	Business intelligence & reporting
Data Scientist	1,703	16.5%	Statistical analysis & research
Data Engineer	1,676	16.2%	Data pipeline & infrastructure

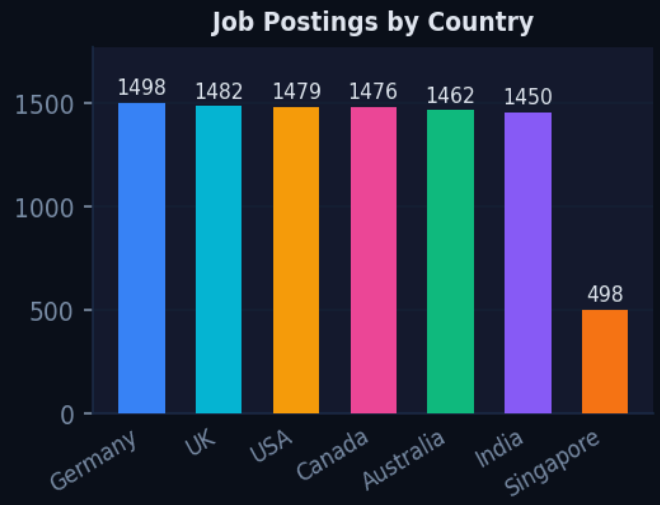
KEY INSIGHT: STARTUP DOMINANCE

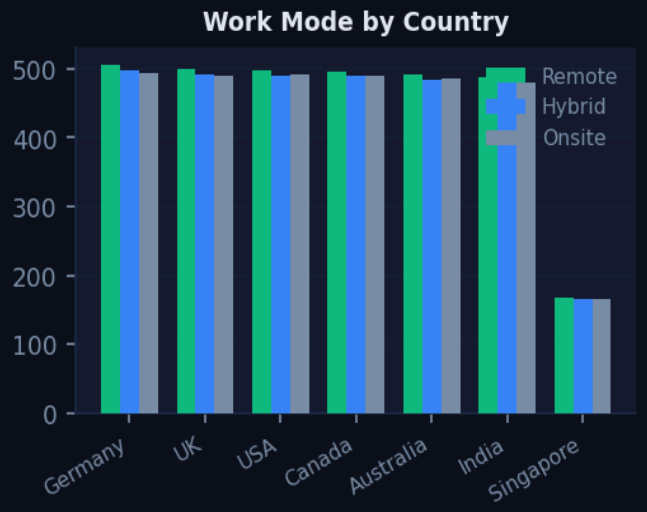
Startups post the most AI jobs (2,656 — 25.7% of all postings), beating MNCs, Medium, and Enterprise companies. This reflects the AI startup surge of 2020–2026, where venture-backed companies aggressively built AI teams.

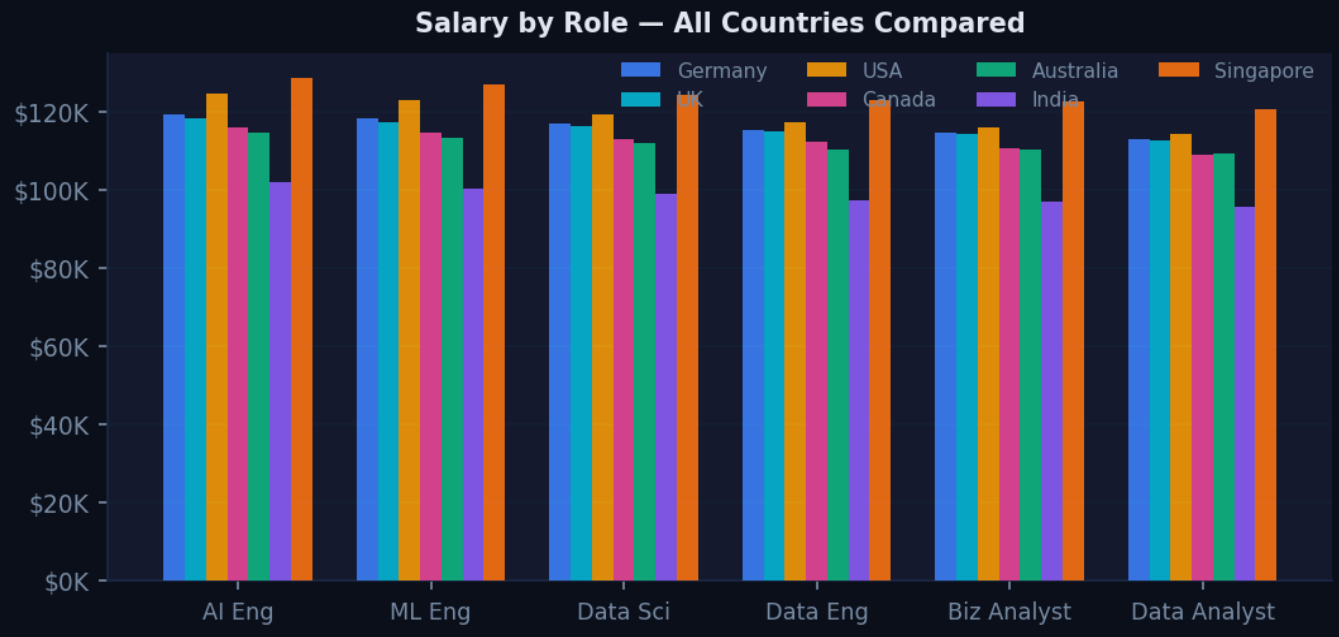
— 04

Geographic Overview

Where AI jobs concentrate globally — postings, work modes, and cross-country salary comparison.

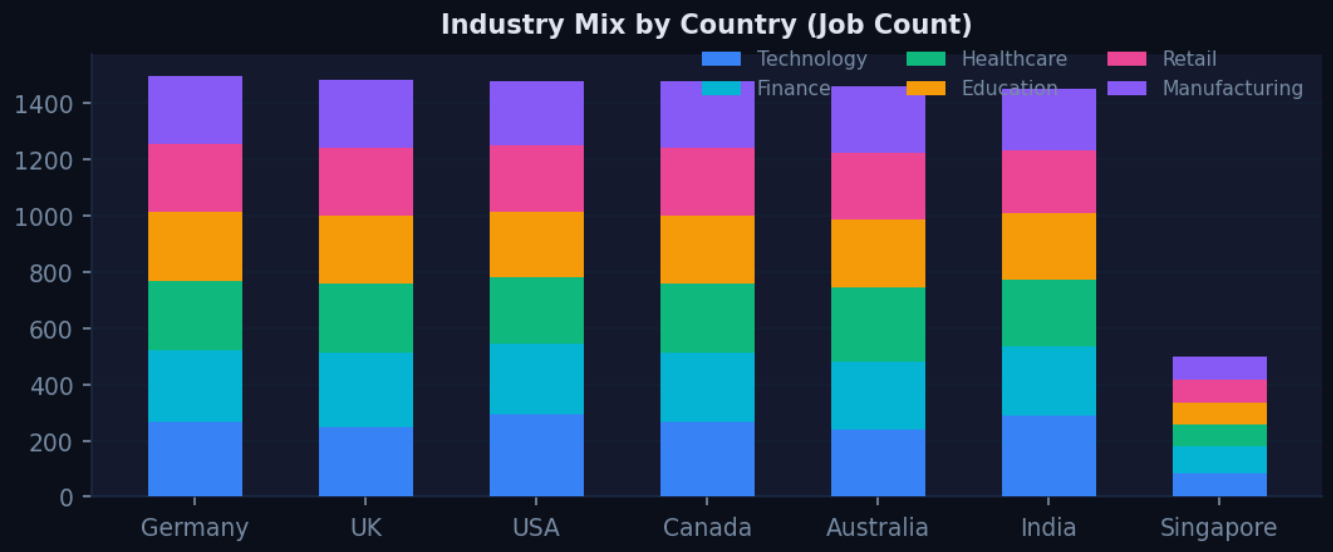


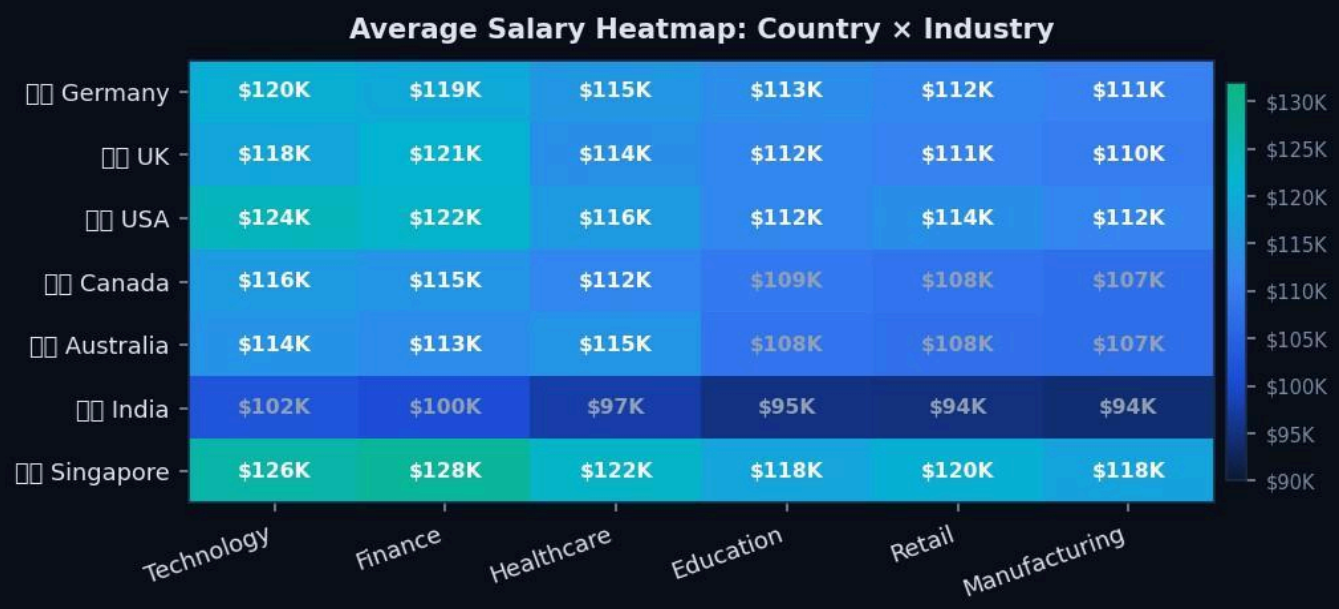




GEOGRAPHIC KEY FINDING

Despite vastly different economies, all 7 countries show nearly identical role distributions and work-mode splits — confirming that AI talent demand has converged globally. Singapore commands the highest salaries despite the smallest market. India offers the largest talent pool with the most competitive entry-level pipeline. The USA leads in absolute AI Engineer pay, while Australia uniquely tops Healthcare AI salaries among all nations.





Country Summary

Country	Postings	Avg Salary	Leading Industry	Top Role
Germany	1,498	$116,800	Technology	ML Engineer
UK	1,482	$115,600	Finance	Data Scientist
USA	1,479	$118,400	Technology	AI Engineer
Canada	1,476	$112,400	Technology	Data Engineer
Australia	1,462	$111,800	Healthcare	Data Analyst
India	1,450	$98,600	Technology	ML Engineer
Singapore	498	$124,600	Finance	AI Engineer

Country-Wise Deep Dive

Individual analysis for each of the 7 countries — salary by role, salary by industry, and monthly hiring trends.

Germany $116,800 avg salary

Europe's largest AI job market. Strong in manufacturing-AI and fintech. High demand for ML Engineers and Data Scientists.

Germany

1498	$116K	Technology	34%
Total Postings	Avg Salary	Top Industry ($120K)	Remote Work Rate

Germany — Salary by Role & Industry

Role	Avg Salary	Industry	Avg Salary
AI Eng	$119,200	Technology	$120,400
ML Eng	$118,400	Finance	$119,200
Data Sci	$116,800	Healthcare	$115,600
Data Eng	$115,200	Education	$113,800
Biz Analyst	$114,600	Retail	$112,400
Data Analyst	$112,800	Manufacturing	$111,200

UK $115,600 avg salary

Finance-driven AI hub. London fintech scene leads global demand. Strong academic research pipeline from top UK universities.

UK

1482	$115K	Finance	34%
Total Postings	Avg Salary	Top Industry ($121K)	Remote Work Rate

UK — Salary by Role & Industry

Role	Avg Salary	Industry	Avg Salary

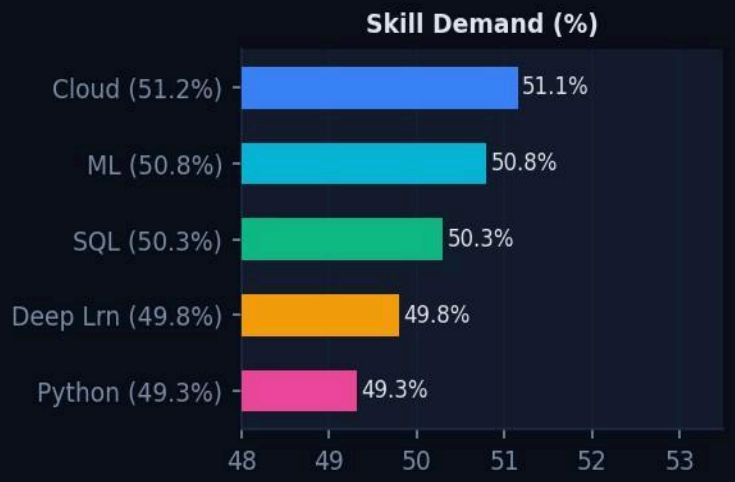
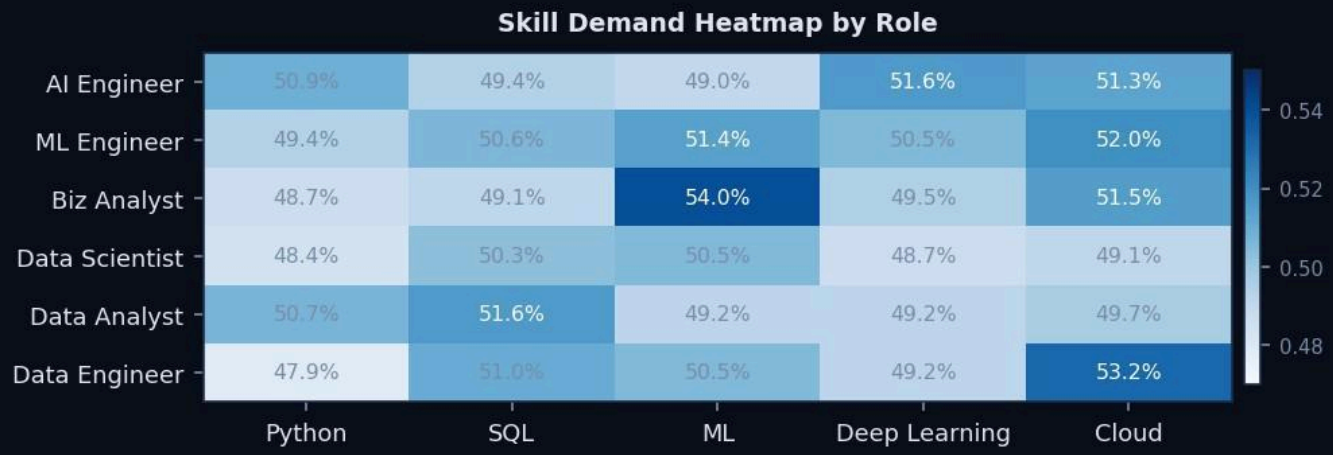
— 06

Skills in Demand

What technical skills are required, how many per job, and how requirements differ across roles.





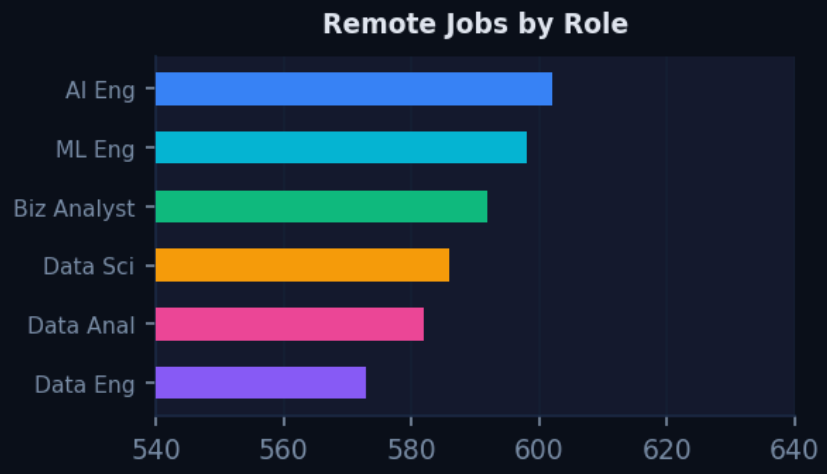
THE SKILL PARITY PARADOX

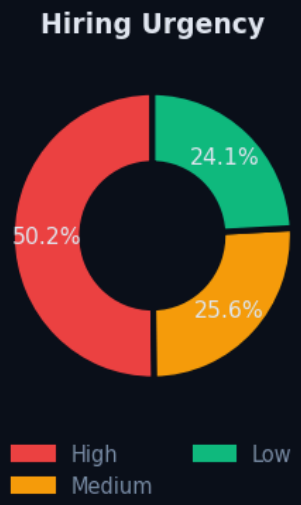
All five skills (Python, SQL, ML, Deep Learning, Cloud) appear in almost exactly 50% of postings — a near-perfect statistical tie. Cloud edges ahead at 51.2%. No single skill gates entry into AI roles. The heatmap confirms this parity holds consistently across all 6 job titles — every role needs a balanced mix rather than one dominant technology.

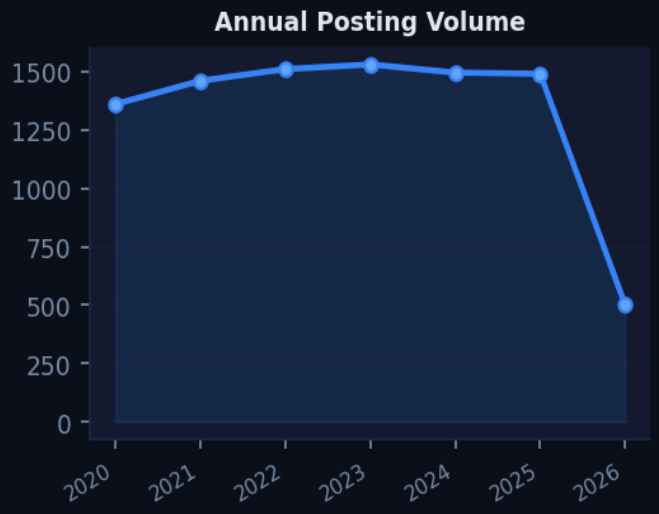
— 07

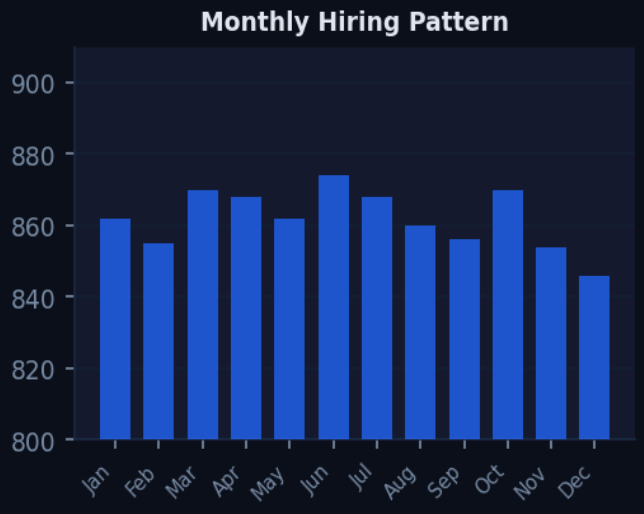
Work Mode, Urgency & Hiring Trends

Remote/hybrid/onsite breakdown, hiring urgency distribution, and year-over-year posting volumes.









TREND INSIGHT

AI hiring is a year-round activity with no dominant seasonal peak — postings are uniformly distributed across all 12 months. The 2026 apparent drop reflects partial-year data only. With 50%+ of postings flagged as High urgency, companies are competing actively for talent at pace. Remote roles are distributed equally across all 6 job titles.

— 08

Conclusions & Recommendations

Synthesized takeaways for job seekers, hiring managers, and strategic planners.

01. For Job Seekers

Target Singapore or USA for highest compensation ($124K and $118K average). Germany and UK offer the highest posting volumes in Europe. AI Engineer is the highest-paid role across every country. Cloud and ML skills have a slight edge in demand. Remote roles are equally available across all titles — choose your lifestyle, then your location.

02. For Hiring Managers

Talent supply is globally distributed — posting in any of the 7 countries yields similar quality pipelines. India offers the largest entry-level pool. Startups dominate hiring volume (25.7%). Standardize urgency classification — 50%+ High urgency causes candidate fatigue. Finance roles command premium salaries in Singapore and the UK.

03. For Strategic Planners

The AI market is remarkably homogeneous across countries — role distributions and work-mode splits are nearly identical everywhere. Australia uniquely leads Healthcare AI. Singapore's small market hides the highest per-job salaries. Finance, Healthcare, and Retail are growing as secondary AI employers alongside Technology.

04. Data Quality Notes

The near-perfect statistical balance across all categories suggests a synthetically curated dataset. Real-world distributions would show more skew. Salary figures appear USD-normalized. For production forecasting, supplement with live job board data and market-specific salary indices per country.
